Yogyakarta, Indonesia

Informatics graduate from Universitas Atma Jaya Yogyakarta with hands-on experience in full-stack web development, responsive applications, administrative dashboards, and WebGIS solutions. Proficient in JavaScript, PHP, React.js, Next.js, Laravel, and MySQL. Experienced in collaborating with development teams, implementing application features, debugging, and translating project requirements into functional web solutions.

Pengalaman Kerja

PT Aerotek Global Inovasi - **Indonesia** Aug 2025 - Feb 2026

Software Development

PT Aerotek Global Inovasi (Beehive Drones) is a technology company specializing in drone technology, IoT, surveillance, and tracking solutions, with a focus on developing innovative technology-based products and services.

- Developed responsive web applications based on UI/UX designs and project requirements, ensuring consistent layouts and usability across desktop and mobile devices.
- Built dashboards for the Procurement and Technical departments to support internal data management, information access, and daily operational workflows.
- Developed an administrative dashboard for the Beehive Drones company profile to support website content management and updates.
- Developed and deployed WebGIS Uriemi, implementing interactive mapping features and geospatial data visualization for location-based information.
- Contributed to the HPP Calculator frontend using Next.js, Prisma, Radix Themes, and Formik to implement interface components and integrate application functionality.
- Collaborated with software developers and analysts to implement application features, troubleshoot technical issues, and incorporate client feedback.
- Identified and resolved frontend bugs through debugging and functional testing to improve application stability and user experience.

Jenjang Pendidikan
